To Whom it Concerns:

We are writing to express our strong support for the proposed vaccine requirement resolution under consideration. Far from negatively impacting restaurants, gyms, etc., such a mandate would encourage individuals like ourselves to return to frequent patronage of these establishments. It is precisely because there is not such a requirement (unlike NYC, for example) that we have not resumed this activity. We know for a fact that there are many who feel the same and are waiting for just such a passport. Indeed, we would further urge the council to consider adding the booster requirement to the passport.

Thank you for considering our views on this matter.
